WORK EXPERIENCE

TechKN Consulting Services Pvt Ltd.

Frontend Developer

Remote

Jul 2025 - Present

- Built an **offshore client dashboard** for internal stakeholders to track **growth metrics, invoicing, orders, and performance records, improving data visibility and decision-making.**
- Developed, maintained, and enhanced **Bluestar dealership projects**, enabling dealers and sellers to manage catalogs efficiently.
- Streamlined catalog management processes, reducing processing time by **~10%** and enhancing overall system reliability.
- Collaborated with backend teams to integrate REST APIs and improve data consistency across modules.

Indian Railway Catering and Tourism Corporation

Software Application Support

New Delhi

Dec 2023 – Jun 2025

- Provided comprehensive support for IRCTC's mobile application on Android and iOS platforms, including issue troubleshooting, updates implementation, and performance optimization.
- **Frontend Modernization:** Successfully **migrated internal monitoring pages** from legacy **JavaServer Pages (JSP)** to a modern **ReactJS** frontend, improving maintainability and faster load time.
- Utilized **PowerShell** for log analysis, issue diagnosis, and troubleshooting production incidents across IRCTC mobile application infrastructure
- Contributed to continuous improvement initiatives by gathering user feedback, proposing enhancements, and monitoring performance for stability and reliability.

Ivy Benefits Pvt. Ltd.

Software Engineer

New Delhi

Jun 2022 - Dec 2023

- Live Site: [Ivy Benefits](#) & [Blue-Ridge](#)
- Proficiently managed UI development using **HTML, CSS, JavaScript, and ReactJS** within a dynamic startup environment.
- Led the end-to-end front-end development of the company's web application, ensuring its successful deployment.
- Collaborated seamlessly with cross-functional teams to align the web application with company objectives.
- Achieved a successful production deployment, significantly improving user experience and overall performance.

Rose I.T. Solutions Pvt. Ltd..

Recruiter Analyst

New Delhi

Nov 2021 - Apr 2022

- Employed various data tools to assess hiring trends, examining the consistency of our recruitment efforts and adjusting our approach when necessary.

PROJECT

Food Ordering WebApp (Link : <https://github.com/mridism/food-ordering-app.git>)

- Developed a small-scale clone of a food ordering website with food cards that seamlessly interact and provide real-time updates using React components and state management.
- Implemented user authentication and authorization mechanisms to ensure secure access to user-specific carts and personalized experiences. Also implemented form validation and error handling techniques to enhance user input accuracy and provide meaningful feedback in case of errors or invalid data.
